Reilly Electrical Contractors

Bill Walsh
14 Norfolk Ave.
Easton, MA 02375

Sent U.S. Mail via fax 508-230-8885

To whom it my concern:

RELCO Electrical and tele/data division played an intricate role in the success of the University of Massachusetts Dartmouth Project. The fast track design build project lead by Project Manager Bill Walsh and project foreman's Rick Bacon and Dan DelSignore proved to be a dedicated and well trained staff to handle this design build project.

The project included six 4 story buildings with 1 commons building made up and overall 80 million dollar project to be built in 12 months. RELCO, with a 6 million dollar contract, maintained the man power and temporary power service required to stay ahead of this schedule and help in the overall early completion.

Suffolk, overall had a great working relationship with RELCO and look forward to doing business together again on future projects.

Suffolk would highly recommend RELCO to other potential clients for contract installation and temporary power services.

Respectfully,
SUFFOLK CONSTRUCTION COMPANY, INC.

Jason Richards
Project Manager
